

HOW TO HOLD THE TENOR BANJO

The instrument is held so that the body of it rests on the right thigh. Elevate wrist of right hand so that it remains two inches above the bridge. The strings are picked at a point half way between the bridge and where the neck joined the body of the instrument. *See Illustration.*

THE PLECTRUM

The Plectrum, or pick must be a large stiff, genuine Tortoise Shell pick. It is held point downward between thumb and first finger of the right hand. *See Illustration.*
